MEA Science Vocabulary/Terminology Guidance 2010-2011

	Grade 5	Grade 8
Direction	compare (similarities and differences)	compare (similarities and differences)
words and	conclude	conclude
phrases	describe	describe
	explain (process, similarities, differences)	explain (process, similarities, differences)
	identify	identify
	list	list
	provide the one that best provide the most likely	provide the one that best provide the most likely
	sort	sort
Organisms	• common biomes including forest, desert, tundra,	In addition to the Grade 5 list:
and	grassland, polar, ocean, rainforest	 extinct organisms and fossils including horse,
Environments	• common life cycles including monarch butterfly,	trilobite, ferns
	frog, grasshopper, dragonfly, salmon	• common elements, mixtures, compounds, and
	 organisms commonly found in the biomes, for 	periodic table groups including calcium, potassium,
	example: moose, vole, pine tree, eagle, raccoon	carbon dioxide, water, noble gases
	(forest)	 food webs of common biomes
	simple food chains	 organ systems including circulatory, digestive,
	• single-celled organisms including amoeba,	nervous, respiratory, skeletal
	paramecium, euglena	
	Adaptation	In addition to the Grade 5 list:
	algae	absorb
Any terms used	ancestor	accelerate
in the Maine Learning	bacteria (bacterium)	amplitude
Results may	balance	celestial bodies
appear on the	biological parent	chloroplast
MEA. The	Celsius (all temperatures in degrees Celsius) change	compound
words listed	(chemical and physical)	convection
may need	conclusion	direct/indirect
special attention	condensation	drag
or may have	data	electromagnetic spectrum
different	energy (light, sound, heat, sound)	elements
meanings for	erosion	energy including mechanical, nuclear, atomic,

Note: This list is a guide. It is an attempt to better delineate the vocabulary demands of the MEA science test. It is possible that it will not be considered complete by all users. Please contact Anita Bernhardt at anita.bernhardt@maine.gov with any suggestions for additions. Words and phrases from prior years may appear in tests at any grade level.

science and	evaporation	chemical, potential, kinetic
technology than	extinct	eyespot
in other areas.	inherited	flagellum
	matter	frequencies
	mixture	friction
	offspring	geological
	phases	glucose
	photosynthesis	impact
	precipitation	indirect/direct
	property	inertia
	record	kinetic
	rotate	lichen
	revolve	mass
	water vapor	mesosphere
	weathering	microorganism
		Newtons
		nucleus
		oxidation
		radiation
		sedimentary
		structural adaptation
		thermosphere
		tissue
		troposphere
